

Puzzle Goal

Uncover the hidden message!

You're a detective, chasing clues about some shenanigans another group is planning. They've been passing messages in a hidden code made up only of numbers. You managed to find a copy of their code sheet in their garbage, but the numbers don't look the same.

Can you figure it out?

You can do this by hand, or you can write a program to do it. That's up to you! I do recommend that you try figuring out the first 5 letters by hand, just for the practice.
